

H400

The light weight hoist.

Main Features

- Easy and fast self reeving hoist
- Modular construction for ease of maintenance and interchanging power attachments
- Thermal overload to protect against overheating
- Fail safe primary brake positively locked with power switch in off position
- Hoist mounted, pendant and central control available
- Low rope wear factor, no point loads to overstress wire
- Independent secondary Safety Brake with manual trip and reset lever
- Emergency descent at controlled speed possible when the primary brake is released

Options

- Overload/underload to protect against platform overloading
- Top limit switch stops ascent at preset height
- Anti-tilt device ensures platform does not tilt beyond preset maximum
- Other power supplies upon request

Specifications

Power Supply	Safe Working capacity	Climbing speed	Power consumption	Selfweight	Recommended steel wire rope
1~240V/50Hz	400 kg	8,5m/min	3,6 Amp	40 kg	6x17S mixed core 8mm
3~400V/50Hz	400 kg	8,5m/min	1,8 Amp	40 kg	6x17S mixed core 8mm
Air	400 kg	8,5m/min	2m/min at 6,5 bar	28 kg	6x17S mixed core 8mm
